Standard Twin Hook Frog Plates are stocked in 23-, 27-, and 31-in. lengths. Other sizes can be made to order.

The Simplest Way to assure a Tight, Rigid Frog

No track foreman purposely allows a frog to be loose or badly aligned. But it sometimes happens; and when it does, the hazard is great.

Our suggestion: eliminate the danger of the loose, jiggly frog by installing Bethlehem Twin Hook Frog Plates.

They anchor the frog securely, preventing lateral movement in either direction. The frog stays rigidly aligned with the rails. No rattle, no play, no loosening up. Here's why:

Twin Hook Frog Plates are always installed in pairs, each plate having its own integral forged hook. During installation the two plates are laid parallel, touching each other, with one hook on each side of the frog base. A tight, snug grip results.

Plates are fastened to the ties by ordinary spiking—a quick, simple job. And here's another point you'll like. Since the plates are used in pairs, you can employ

the same length at several *different* tie positions under different angle frogs. No need for a large and confusing variety of lengths.

These simple, sturdy frog plates are low in cost, and there's virtually no maintenance. They're a safety device that belongs under every frog. Why not ask for details? Folder 390 will bring you the full story.

The Westinghouse
Air Brake 6-SL
Brake Equipment

THE day is gone when yard locomotive engineers spent more time controlling the locomotive than they did switching cars. Now, with the aid of Westinghouse 6-SL Brake Equipment, yard locomotives are controlled easily and accurately, and the engineer can devote his full attention to the switching operation.

The 6-SL Brake Equipment is built specifically for yard switchers. It provides a high degree of flexibility—matching that of the Diesel switcher itself. It performs along with the Diesel, 'round the clock, and thereby contributes to the high working availability of yard switchers.

The 6-SL Brake provides all the basic functions that enable a modern yard switcher to perform most productively and economically.
